Javascript/Typescript

Building robust, scalable, and type-safe applications for the modern web. I leverage the object-oriented power of Java for backend services and the strict type-checking of TypeScript to write clean, maintainable front-end code and APIs that prevent errors before they ever happen.

Digital Illustration

Building robust, scalable, and type-safe applications for the modern web. I leverage the object-oriented power of Java for backend services and the strict type-checking of TypeScript to write clean, maintainable front-end code and APIs that prevent errors before they ever happen.

Digital Illustration

Creating unique, custom vector illustrations to bring personality and character to a brand. From custom icons and spot illustrations to complex infographics, I use illustration to tell a story that photography or typography alone cannot, giving projects a truly unique voice.
