HEY!, IT'S **DENNIS AD**

DESIGNER

I am fluent in aesthetics, user journey mapping, and the subtle art of telling a client 'no.' My mission is to fight against visual noise and create designs so clean, they could pass the ultimate WCAG accessibility test.

DEVELOPER

I architect the backend plumbing and craft front-end functionality, sometimes simultaneously. My primary hobby involves debugging a line of code for six hours, only to realize I missed a semicolon.

HEY!, IT'S **DENNIS AD**

DESIGNER

I believe in coffee, clean files, and a little too much sarcasm. If it doesn't spark joy, I delete it.

DEVELOPER

My history includes coding since the days of dial-up and an unhealthy commitment to version control. I'm usually solving problems while talking to myself.

HEY!, IT'S **DENNIS AD**

DESIGNER

I master aesthetics and user flows using CorelDRAW, Photoshop, Illustrator, and the power of unlimited 'undo.'

DEVELOPER

Tech stack is robust: JavaScript, Node, React, and databases that actually listen to me. Bugs are optional.

HEY!, IT'S **DENNIS AD**

DESIGNER

I turn complex ideas into stunning, high-fidelity mockups. The finished product must be beautiful.

DEVELOPER

I ensure those stunning mockups actually load, scale, and pass every lighthouse test. Performance is not a suggestion.
